ABOUT US

Full-Stack Developer with a Bachelor's degree in Software Engineering, product and software quality. I link TypeScript interface design, business API development, service integration and production, with a particular focus on user experience, component reusability and code maintainability. My approach is to transform business needs into reliable, consistent and scalable digital solutions, reconciling functional requirements, technical quality and ease of use.

KEY COMPETENCIES

ARCHITECTURE & API End-to-end feature design • Java / Spring Boot • REST API • mobile/backend separation • third-party integrations	**UI/UX & PRODUCT QUALITY** Responsive interfaces • reusable components • UI consistency • user journey • attention to accessibility
DATA & BUSINESS PostgreSQL / MongoDB • relational modeling • synchronized data • delivery tracking logic and statuses	**DELIVERY & EXPLOITATION** Git / GitHub • Jenkins • GitLab CI / EAS and delivery automation • VPS Linux, Nginx, PM2 • production diagnostics

PROFESSIONAL EXPERIENCE

Software & AI Engineer | Group Requirements | *06.2026 – 10.2026*

- Design and development of **ExiJob**, a pan-African recruitment platform, from needs analysis to development, integration of services and production.
- Development of **the full-stack** functionalities, APIs and business logic necessary for the management of candidates, recruiters, job offers, applications and recruitment processes.
- Implementation of an observability stack (Prometheus + Grafana + ELK + Sentry) and an SLO/alerting system, reducing the mean time to recovery (MTTR) from approximately 3.5 hours to less than 25 minutes.
- Ensured effective coordination with offshore and development teams throughout the software development lifecycle.
- Integration of generative **AI and LLM-based** features to improve the user experience and automate certain business tasks.

Lead Mobile & Backend Developer | Bokk Dem SARL | *11.2025 – 03.2026*

- Design, development and delivery of a mobility/delivery mobile application bringing together a Customer application, a Driver application and a backend API.
- Development of applications with React Native / Expo and backend services with NestJS; structuring of data on PostgreSQL via Supabase and use of real-time capabilities.
- Integration of mapping and geolocation bricks (Google Maps), notifications (Firebase / FCM) and verification by OTP via SMS providers.
- Implemented and operated the deployment of the API on Linux VPS with Nginx and PM2; version management and mobile delivery cycle with GitHub, GitHub Actions and EAS.
- Integration of the payment journey and consideration of the supplier's technical requirements (HTTPS return URLs and API exchanges).

Software Engineer | Fathala-IT | *01.2025 – 09.2025*

- Developed full-stack features for a B2B SaaS product using React, Java, Vue.js, Node.js and PostgreSQL; I delivered 8 major features in the first month.
- Participated in the improvement of Agile/SCRUM processes; implemented simple indicators to assess the status of sprints and corrective actions from retrospectives, which improved predictability (on-time delivery) by 30%.
- Optimization of front/back flows and service responsiveness.

Full Stack Developer | Elite Dental Laboratory | *05.2022 – 01.2025*

- Design, development and maintenance of websites, logistics and e-commerce platforms as well as services and APIs meeting specific customer needs.
- Integration and customization of backend features in collaboration with frontend designers and developers
- Corrective and evolutionary maintenance, performance optimization and resolution of technical problems in a customer environment.
- Train customers and team members on the use of the company's various platforms

OMAR SECK | Full-Stack Software Engineer

SELECTED PROJECTS

- **BOKK DEM — Mobility and delivery platform**
  MVP with Client app, Driver app, backend API, mapping, geolocation, notifications, and third-party integrations. Stack: React Native / Expo, NestJS, PostgreSQL / Supabase, Firebase / FCM, Google Maps, GitHub / EAS. Driver app on Google Play: https://play.google.com/store/apps/details?id=com.bokkdem.driver.
- **YOBBAL — Parcel tracking platform**
  Shipment tracking, package statuses, administration area and consultation path. Stack: React / Next.js, React Native, Node.js / Express, PHP, MySQL and Vercel. Link: https://www.yobbal.sn/.
- **EXIJOB — Jobboard panafricain**
  Recruitment platform with search and job management, designed for the African job market. Stack: Angular, Python, TypeScript, PostgreSQL, OpenAI, AWS. https://exijob.com
- **ELITE DENTAL — Website and optimization**
  WordPress site with custom theme, service catalog, SEO, security, and performance optimization.

TECHNICAL FOUNDATION

Backend & API	Node.js, Java (Spring Boot, Quarkus), JavaScript, API REST
Mobile & Web	Vue.js, React Native, Expo, Angular, React / Next.js, HTML, CSS, TypeScript, Flutter, natif iOS/Android
Data	PostgreSQL, Supabase, MySQL, MongoDB (internship / web projects)
DevOps & Tools	Linux / VPS, Nginx, PM2, Git, GitHub, EAS, GitLab, Jenkins, GitHub, Docker, Kubernetes, OpenShift, Ansible
Tests	JUnit, Vitest, Jest, Cypress, Selenium

EDUCATION

Professional Bachelor's Degree in Software Engineering - Institut Supérieur d'Informatique (ISI), Dakar.
Relevant Courses: Distributed Systems, Databases, Software Engineering, Algorithms

LEADERSHIP & METHOD

- Translation of functional needs into technical tasks and incremental deliverables; pragmatic arbitration between deadline, scope and quality.
- Technical coordination around a mobile/backend product; documentation and sharing of decisions to be formalized as part of a Lead role.
- Collaboration with product and technical profiles; clear communication on dependencies, risks and bottlenecks.
